

Report: Operation Advantage - 16-08-2002

Operation Advantage

August 16th , 2002

Mission Status: Complete

Mission Classification: Theta IX Rescue

Personnel

Dracuna, Acid Burn, Glantry Fett, Phil Fett, Padme Fett, Davie and Nef Burns

Injuries to Personnel:

Dracuna - broken wing, hurt leg, and cuts and bruises.

Nef-Stangled by a Jaffa

Padme Fett- a broken ankle

Other minor bumps and bruises to additional personnel

Briefing – Made by Padme Fett

The RS has been called upon by the Asgard, Thor has been taken by the Goua'ld and is being held and tortured on a Goua'ld master ship. Meanwhile the replicators are attacking. Shields on the ship are down. We will go thru the gate to PX7-994. there are transporter rings on the planet where we will then transport to the 3rd level on the Gaou'ld ship. With all the Gaou'ld fighting the replicators we should have it easy going to the 1st level where Thor is. We will then set the auto-destruct and will have 10 minutes to transport back down to the planet. The auto-destruct is 3 rooms over from where Thor is being held. Intel has found that in the room with Thor there are data cards with important new Gaou'ld technology. We will try and get this information.

Gear- We have gained Gaou'ld patrol uniforms

Weapons-Command officers are issued a sidearm of their own choosing. Standard issue secondary weapons are the BlasTech DL-18 blaster pistol and a New Republic issue vibroblade. We will have Nurgon 14 charges ,and a Biotech MediKit for first aid treatment.

Mission Report – Made by Padme Fett

After a 30 minute briefing. Since Padmé had to type the whole thing out. We traveled thru the Stargate to planet PX7-994 A very humid rainy tropical planet. As Drucuna was coming thru the gate on the other side, she tripped a trip wire. Glantry disarmed it and We made our way to the transporter rings to the pyramid on the planet which are across a long rope n plank bridge from the Startgate. Dracuna flew to the other side as the other Rs members went across the swaying old bridge. Padme making the bridge sway more for the fun of it. Padme's foot falling thru a rotten plank. Glantry helped her across. After crossing the bridge we made our way up 30 steps to the rings in the pyramid. Phil found the control panel and we transported to the 3rd level of the Gaou'ld ship. Phil scanned the area to find many replicators and jaffa. We then made our way down the corridor to the elevator thingy. Dracuna was attacked as her weapon jammed and she was swarmed by Replicators. Glantry, Acid, Nef and Phil helped clear them off her and took out the remaining replicators that were around. We made our way to where Thor was, got him, Acid, Nef, Padme got captured and locked in a room. They spent a little while pondering how to get out. While Glantry, Phil and Acid kicked Gaou'ld butt. Glantry, Davie and Phil came to the rescue of the locked up klan. Glantry carrying the little guy with him. Glantry by blowing up the door. We made our way to the where the self destruct was. Phil getting lost. The self destruct was initialized. We made our way back. Glantry carrying the little guy Thor. While acid and Glantry fighting about what color he is. Meanwhile Phil finds the team. with a few minutes left we head for the transport rings being chased by replicators. Padme running behind everyone else trips and falls. Dracuna comes and carries Padme to the rings. With 5 seconds to spare with Padme's bad math. Padme keep saying 0 seconds left till self destruct so then Rs members get back to the rainy planet. We enjoy the fireworks of the ship blowing up and Go thru the gate and return home. Dracuna taking padme to medical and Phil and Glantry taking a break sipping soda while trying to figure out whom was keeping the little grey guy. We then went to O'malleys afterwards.
